Parts of a Circle

TERM	PICTURE	DEFINITION
CIRCLE		A set of points that are <u>equidistant</u> from another given point, called the <u>center</u> .
RADIUS		The distance from the <u>center</u> to the <u>outside</u> of the circle. $r = \frac{1}{2} d$ <i>The radius is equal to half the diameter.</i>
DIAMETER		The distance <u>around</u> the circle. It goes through the <u>center</u> of a circle connecting two points on the <u>outside</u> . $d = 2r$ <i>The diameter is equal to double (2x) the radius.</i>
CIRCUMFERENCE		The distance <u>around</u> the <u>outside</u> of the circle. Formula: $C = 2\pi r$ or $C = \pi d$
π	pi	The <u>ratio</u> of a circle's circumference to its diameter. The symbol for pi is π π is an <u>irrational</u> number. π is approximately <u>3.14</u> 

Examples:

1) Calculate the following:

Given...	Find...	Answer
Radius (r) = 10 in $\times 2$	The diameter (d)	d = <u>20</u> in
Diameter (d) = 6.4 in $\div 2$	The radius (r)	r = <u>3.2</u> in
Radius (r) = 12.3 in $\times 2$	The diameter (d)	d = <u>24.6</u> in
Diameter (d) = 1 in $\div 2$	The radius (r)	r = <u>0.5</u> in

2) The radius RP is 6 inches.
What is the length of AN?AN represents the diameter

$$6 \times 2 =$$

$$AN = \underline{12 \text{ in}}$$

radius = 6

3) The diameter of OB is 14 cm.
Find the length of XM.XM represents the radius

$$14 \div 2 =$$

$$XM = \underline{7 \text{ cm}}$$

Try It!

1) Calculate the following:

a. Given: radius (r) = 8 inches, find the diameter (d)

$$d = \underline{16} \text{ in.}$$

b. Given: diameter (d) = 14.6 inches, find the radius (r)

$$r = \underline{7.3} \text{ in.}$$

c. Given: radius (r) = 6.5 inches, find the diameter (d)

$$d = \underline{13} \text{ in.}$$

d. Given: diameter (d) = 11 inches, find the radius (r)

$$r = \underline{5.5} \text{ in.}$$

e. Given: radius (r) = 9 inches, find the diameter (d)

$$d = \underline{18} \text{ in.}$$

2) The diameter of Lexa's hula hoop is 36 inches. What is the radius of Lexa's hula hoop?

- A 6 in. B 9 in. **C 18 in.** D 72 in.

3) A duck swims from the edge of a circular pond to a fountain in the center of the pond. What term describes the duck's path? **Draw it out.**

- A chord C diameter
B radius D central angle

4) The radius KP is 3 inches. What is the length of NQ?

- A 3 inches B 4 inches
C 6 inches D 9 inches

[not drawn to scale]

#5-9 Fill in the questions below using the word bank and Circle B.

DIAMETER CIRUCMFERENCE RADIUS VERTEX ANGLE

5) The Circumference is the distance around the outer edge of a circle, the perimeter.

6) BF is a radius in circle B.

7) $\angle CBD$ is an angle whose vertex is at Point B.

8) The distance across the circle through the center is the diameter.

9) AG is the diameter in circle B. **True or False**

** does not go through center **
